About Us

Natural Organic Food For Healthy Living

Our humble origin dates more than a decade back, set forth by an inspiring account of courage and perseverance. It all started when one of our dear ones was diagnosed with cancer and the efforts that followed to save her from the hardships of the deadly ailment. Medications weren't enough to ensure a complete recovery and we were advised by the doctors to include nutritious, organic foods in her daily diet as an effective means to replenish and repair her frail immune system. Thus we embarked on our literal quest in search of genuine organic produces across several parts of Southern India. We knew the task was never going to be easy as organic food and its benefits were still an alien concept to the majority. It was no coincidence that we found what we came looking for in the glorious backdrop of biodiversity – The Western Ghats. Our constant acquaintance with groups of enthusiastic farmers in Wayanad, Palakkad and The Nilgiris and their honest efforts at growing fresh, natural farm produces, abiding strictly to organic farming techniques, eventually helped us to save our dear one from the clutches of death. It was at this moment of realization that the first seeds of BABAS NATURAL BASKET were sown.

Vision

What started as a labour of love marked the way to fulfil our vision to provide affordable and accessible organic food stuffs to the common masses. We hope to encourage everyone to start contemplating the benefits of going organic and to be mindful of the fact that evidence based nutrition offered by organic food culture can literally save lives. We consider our earnest endeavour as a tribute to our beloved kin.

Mission

Babas Natural Basket aims at promoting a healthy food culture based on conventional organic food ideas, in a day and age when the very food we consume becomes the deciding factor for good health and long life. Inadequate nutrition and chronic conditions related to toxic intake are still the leading cause of premature death all around the globe. Our organic food cart offers highly nutritious food supplies, free of any kind of synthetic additives. Further, organic farming methods contribute massively to rid the soil of harmful chemicals, thus restoring its natural fertility. Be part of the family and encourage us in our honest efforts to realize our dream for a healthy world and a greener earth .

READY TO COOK PASTES

India is home to not just spices but also some of the best farm produces known to the world. But on its way from the farm to the table, they tend to lose their freshness. Our range of cooking pastes are made from handpicked farm fresh produces, processed using superior state of the art technology within 24 hours of their harvest, untouched by human hand and hence locking in their honest and authentic flavour into a convenient, easy to use tube. Quick to add, easy to store and great to taste simply makes it the world's finest cooking pastes to have on your grocery shelf

SPICES & GRAM MASALA

Spices have been an enchanting and romantic presence in numerous episodes of human history, including geographical discoveries, curing ailments and economic welfare. They entice our senses with their vibrant colours, captivating aroma and stimulating flavour. A well equipped kitchen needs a filled up spice rack with an assortment of spices and condiments used to add aroma, taste and texture to our daily food. Spice production has evolved as a technology-based, quality conscious, customer centric industry with India commanding the pole position in world spice trade. The emphasis on using organic spices has assumed great importance in present times.

RICE, WHEAT AND MILLETS

Rice, wheat and millets are an ingenious part of human nutrition and caloric intake since historic times. The love for rice can be best described by the Japanese saying, 'A meal without rice is no meal' while millets are traditionally considered as a super food to a healthy and active body. Wheat and its varieties, just like rice, hold an irreplaceable place in many food cultures worldwide. While rice and wheat are super rich in essential macro nutrients like carbohydrates, proteins and fiber, Millets are a treasure chest of important micro nutrients including several B vitamins, iron, calcium, manganese etc.

TEA & COFFEE

It will be a surprise to many that two of the most popular beverage in the world has a legendary account of history attached to them, filled with war, revolution, adventure, intrigue, social change and artistic expression. From the time when Bach poetically described coffee to be “lovelier than a thousand kisses, sweeter far than muscatel wine” and Thomas De Quincey wrote “Tea, though ridiculed by those who are naturally coarse in their nervous sensibilities, will always be the favoured beverage of the intellectual”, the cultural relevance of tea and coffee have become so entwined with the social habits and artistic ambitions of the world that coffee have become the biggest cash crop on earth and tea have become the world’s most popular beverage. The once soothing, laid-back ambience associated with a cup of tea or the hectic, fast-paced setting of the coffee culture is fast changing due to the revolution going on with countless number of different flavours and blends rising and falling in the market. This is why we are making an attempt to cater to every palate, taste and personality with our organic range of hot beverages.

AGMARK NATURAL HONEY

The glorious presence of honey and sugar in human history is as old as history itself. Humans have eaten, bathed in honey, fixed wounds and traded them in horde throughout history but we are yet to fully appreciate the true value of pure honey and sugar in today's world of general convenience, technological marvel and a plethora of easy substitutes. Babas Natural Basket brings you pure honey and sugar exactly how nature intended.

SKIN AND BODY CARE, WASHING AND HYGEINE

Your body and home deserves the very best of personal and general hygiene now more than ever. Browse through our range of 100% herbal cleaning and hygiene products engineered to care for your skin, free from any chemicals or slurry. Choose herbal, choose life

WHY CHOOSE ORGANIC?

  Babas-Natural

We often ponder over the root cause of high premature mortality today in spite of so much development in the medical field. It is high time we realise that the secret to your good health and longevity is the food you eat today. Most premature deaths around the world are preventable as most of them are related to inadequate nutrition. What makes organic food more nutritious over regular food is the presence of high levels of phenolic phytonutrients and the absence of highly toxic pesticides in organic foods, as proved by several scientific studies. The science behind promoting an organic food style is pretty straightforward – why take the risk of exposing yourselves and your loved ones to harmful chemicals, which studies have found to be directly related to chronic conditions like cancer, diabetes, Parkinson's disease, Alzheimer's disease, brain development in children and reproductive problems when you can simply choose to go organic.
